

Bharatiya Vidya Bhavan's
SARDAR PATEL INSTITUTE OF
TECHNOLOGY
(Autonomous Institute Affiliated to University of
Mumbai) Mumbai - 400 001

Experiment	5
Aim	Create an app for MCA department using side and tabs navigation
Objective	<ul style="list-style-type: none">● To Create MCA App using UI Component● To Develop SideDrawer and Tabs Navigation in one application● To Use 60-30-10 rule● To Use Webview concept● To Use Expandable Card View Concept
Name	IFFAT PATEL
UCID	2024510041
Class	FYMCA
Batch	B
Date of Submission	12/3/25

Technology used	FLUTTER
Task	Create an app for MCA department using side and tabs navigation consisting of the following: <ol style="list-style-type: none">1) Faculty information with Expandable Card view2) Department Vision and Mission with expandable Card view3) Notification of any upcoming event (links to the website).4) WebView5) Feedback form along with rating
Code with proper label	Main.dart <pre>import 'package:flutter/material.dart'; import 'package:flutter/services.dart'; import 'screens/splash_screen.dart'; import 'theme/app_theme.dart'; void main() { WidgetsFlutterBinding.ensureInitialized(); SystemChrome.setPreferredOrientations([DeviceOrientation.portraitUp, DeviceOrientation.portraitDown,]); runApp(const MyApp()); } class MyApp extends StatelessWidget { const MyApp({Key? key}) : super(key: key); @override Widget build(BuildContext context) { return MaterialApp(title: 'MCA Department App', debugShowCheckedModeBanner: false, theme: AppTheme.lightTheme,</pre>

Question and Answers	<p>Answer the following Questions:</p> <ol style="list-style-type: none">1. How to create SideDrawer and Tabs Navigation both? To create both SideDrawer and Tabs Navigation in a Flutter app, use the Scaffold widget with a Drawer for the SideDrawer and a TabBar or BottomNavigationBar for tab navigation. Implement TabController for managing tab selection and wrap the content inside a TabBarView to switch between screens seamlessly.2. How did you use 60-30-10 rule in your application? The 60-30-10 rule in UI design ensures a balanced color scheme by using 60% as the primary color (background or dominant elements), 30% as the secondary color (buttons, cards, sections), and 10% as an accent color (highlights, calls to action) to create contrast and visual interest.3. Which new elements did you use for creating UI components? New UI components used in an application may include ElevatedButton, BottomNavigationBar, ExpansionTile, PageView, SliverAppBar, GridView, and Stack, enhancing interactivity, layout structure, and user experience.4. In pubspec.yaml file, what dependencies need to be there? The pubspec.yaml file should include dependencies such as flutter, cupertino_icons for iOS-style icons, http for API requests, provider or riverpod for state management, webview_flutter for embedding web pages, and shared_preferences for local storage.5. How to create Expandable view? To create an Expandable View, use widgets like ExpansionTile for expandable lists or AnimatedContainer and Visibility combined with setState to dynamically toggle the height and visibility of UI elements.6. How to create Webview? To create a WebView in Flutter, use the webview_flutter package, initialize a WebViewController, and display web content within a WebView widget inside a Scaffold to enable browsing functionalities.
Conclusion	<p>Your Learning from the session.</p> <p>The session provided insights into implementing essential UI navigation patterns in Flutter, such as integrating both SideDrawer and Tabs Navigation effectively. It also reinforced the importance of UI design principles like the 60-30-10 color rule to maintain a visually appealing interface. Exploring new UI components enhanced the understanding of creating interactive and user-friendly applications. Understanding dependencies in the pubspec.yaml file highlighted the significance of managing external packages for added functionalities. Additionally, learning to create expandable views and WebView implementations expanded knowledge of dynamic UI elements and embedding web content within Flutter apps.</p>
